

Top Linux Server DISTROS

Ubuntu Server

Ubuntu is world's one of the best Linux distros for cloud servers. Hence, it provides one with an efficient user experience. Therefore, it is a more profound server as a game server, email server, and media server.

Red Hat Enterprise Linux

Red Hat Enterprise Linux (RHEL), built by Red Hat, is an open-source Linux distribution. Hence, it is one of the most popular Linux server distros used by 500 Companies.

Fedora Server

Fedora, a fresh Linux server OS for the one who is new to the Linux world, supports various desktop environments. Therefore, it is best Linux for cloud servers carrying experimental technologies for commercial use.

SUSE Enterprise Server

SUSE Software Solutions sponsor both OpenSUSE and SUSE Enterprise Server, where the significant difference between the two is stability and reliability.

Oracle Linux

Oracle Linux is also one of the best Linux distros for cloud servers powered by Oracle. Two Kernels are available in Oracle: a Red Hat Compatible Kernel (RHCK) and an Unbreakable Enterprise Kernel (UEK), both working well with different hardware.
